

Sometimes reality is better than imagination.

meet jeriko house

The team at Jeriko House set out to create modular housing with unsurpassable versatility, function, and design. The result? A house that is forward thinking in its aesthetic appeal, logical in every element of composition, and is a genuine pleasure to own, maintain, and live in. Jeriko Houses are truly customizable so there are options for everyone - from the first time homebuyer to the multiple home owner.

We believe there is a better way to build, and a better way to live, for everyone. Simply put, nothing should keep you from owning the home you have always dreamed of. And this home will be more responsible to its owner, the environment, and the future, without sacrificing design, strength, or function. Jeriko House is proud to pioneer a new age in housing and real estate in America, and we know you will be too.

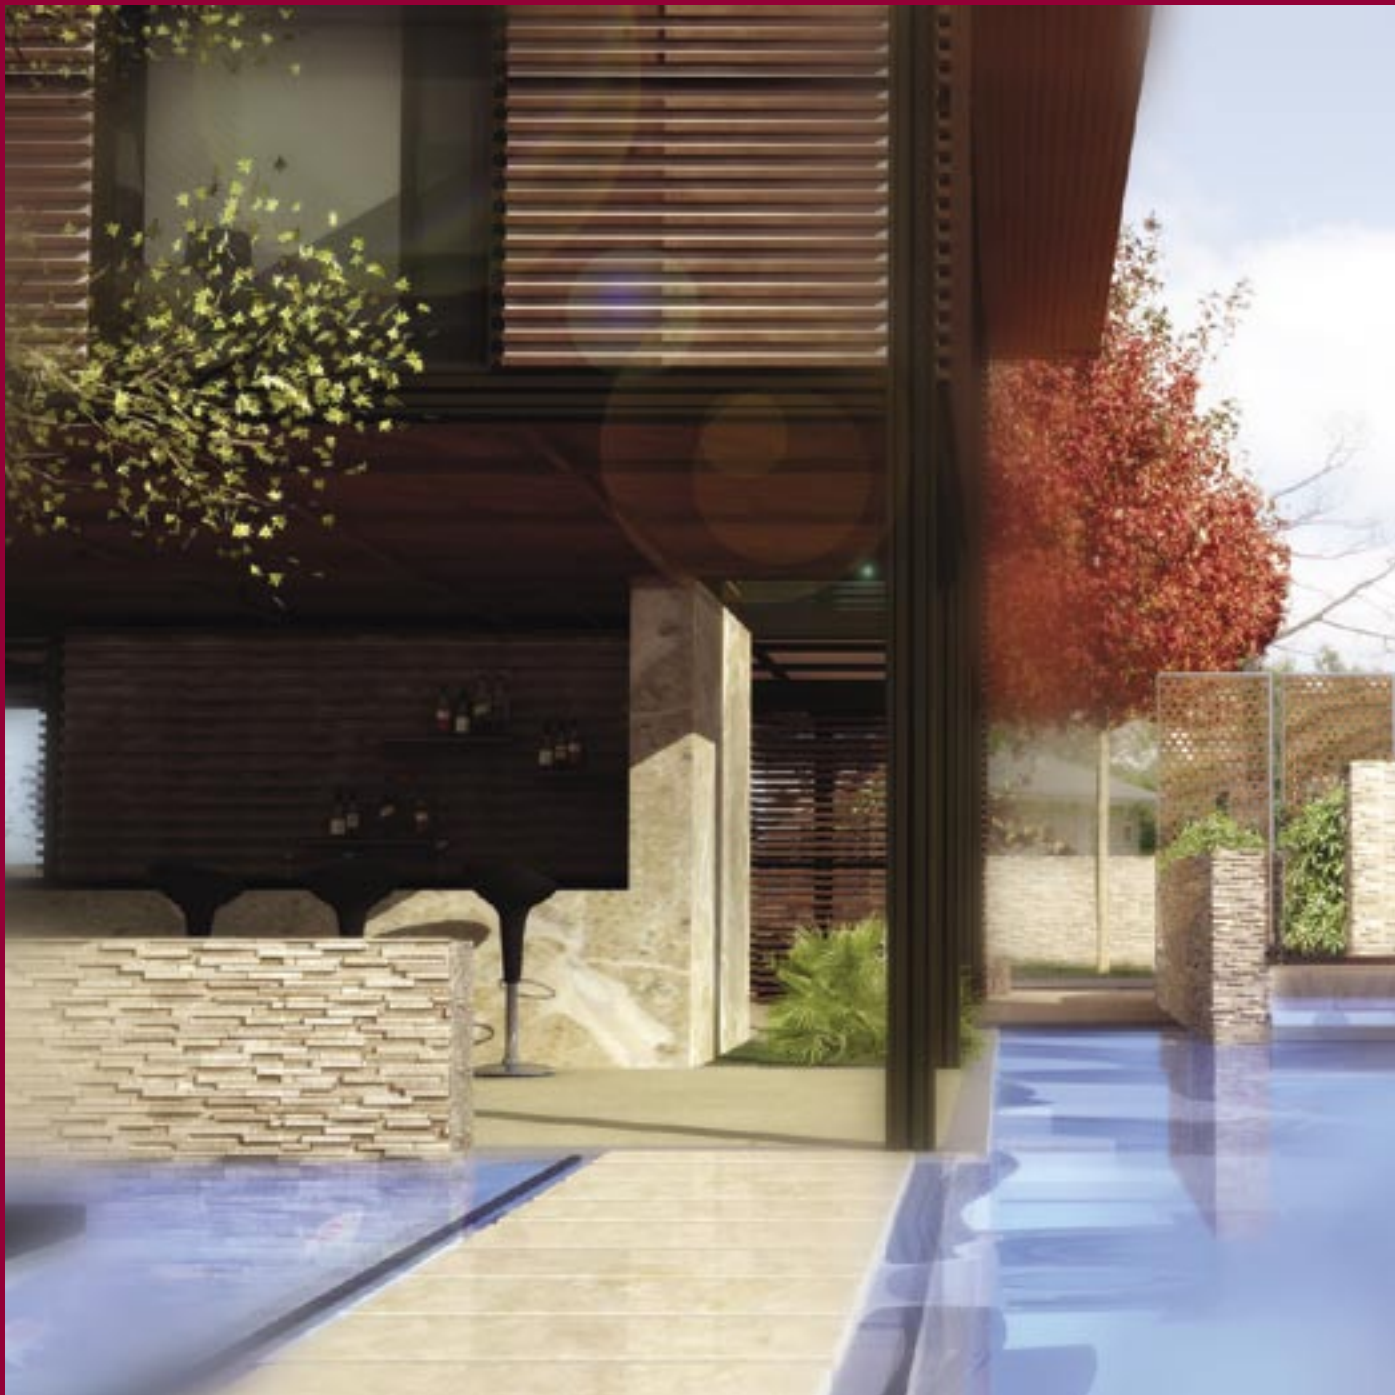

Kindest Regards,
Shawn & Angelina Burst
Founder/CEO

strength, longevity + quality

A Jeriko House is a building of the future. A virtually indestructible grid of aluminum and stainless steel so versatile it can be adapted to suit any number of situations and environments. Using patented technology developed exclusively for Jeriko House, the modular building system can be custom designed for a wide range of applications. Regardless of use, your Jeriko House will exceed your expectations for years to come.

versatility

A Jeriko House is admirable - great in any situation and ready for whatever life has in store. These innovative, multipurpose homes are truly modular in their construction. The expandable design permits units to be extended at any time with strength and style. Our wide range of custom options allow for individual results, making your Jeriko House truly your home. Rugged, adaptable, strong, and mobile, Jeriko House manages to be everything to everyone, looking great all the while in sleek stainless steel and elegant wood. This flexibility is consistent in our cost and availability, just one more way Jeriko House is changing the way we think about houses.

modular construction

The Jeriko House is designed along a spine that is 4' wide, and can take on any length and configuration.

The spine can be straight, "L" shaped, "U" shaped, or in any linear configuration that is being desired.

We have created standard room sizes that are based on a 4'x4' grid. These room modules can be used in conjunction with or without the spine. Our room modules have the following configurations.

4x4 Unit
16' x 16'

3x4 Unit
12' x 16'

2x4 Unit
8' x 16'

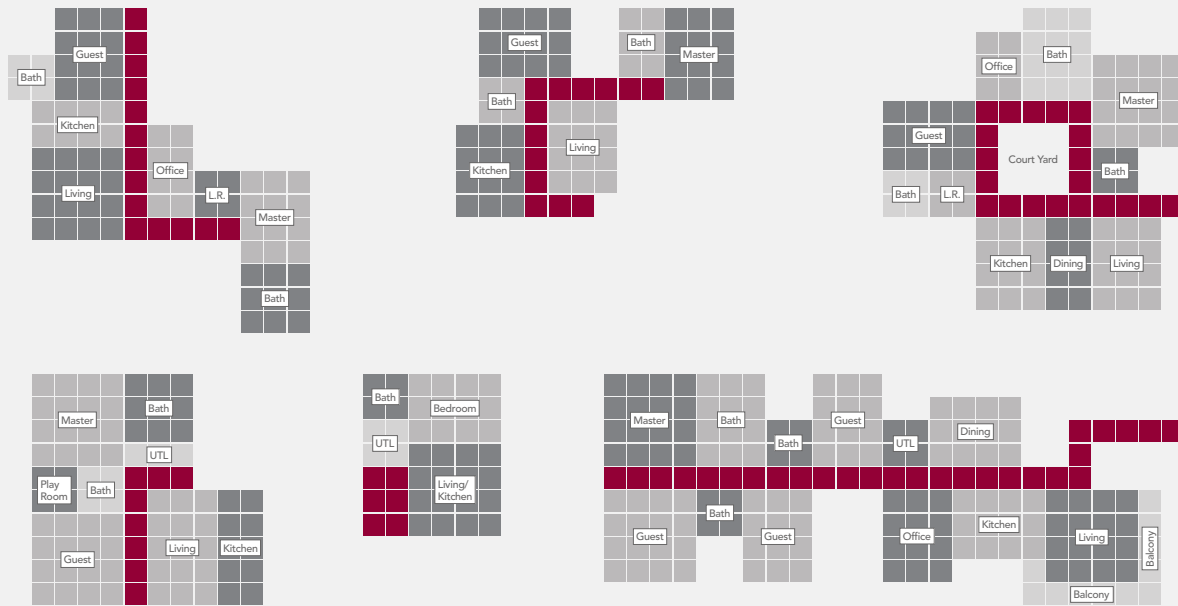

2x3 Unit
8' x 12'

2x2 Unit
8' x 8'

expandable design

The Jeriko House is adaptable to suit its owner's individual needs. The standard room modules can be connected with ease, in any desired order and layout, creating larger and more complex structures.

The modules are supported by foundation poles which extend as structural pillars to a height of 9'-10" above floor level. Wall, door and window panels are added between the structural pillars to create a flexible configuration. Units can also be extended at any time, adding terraces, rooms and hallways to existing modules.

The floor unit can be extended by 4 feet on all sides without additional vertical supports. Supported larger decks, terraces, and roof extensions are also possible.

design

Integrity, beauty, and options - without limits.

Jeriko House is superior in both concept and execution. Every wall, every floor tells a story of elegance, sophistication and world travels. Each finish and detail gives maximum impact to both beauty and individuality. Exotic wood floors and walls exude warmth and a feeling of home; precious stone, granite, and marble provide strength and elegance; glass walls allow for the symbioses of outdoors and indoors; and shiny, sleek aluminum and stainless steel enhance the beauty of its surroundings.

value

Your home. It's possibly the most important purchase you'll ever make. In a time when current housing options are failing the consumer financially, when existing structures are either prohibitively expensive or carelessly designed, the process of building your own home from the ground up is a daunting labyrinth of cost, frustration, and disappointment. Enter Jeriko House, a new concept in pre-fab housing, to address the problem and offer a solution. With its uniquely flexible design and everlasting strength of construction, a Jeriko House is an equally flexible and strong financial decision. Though intentionally far different than traditional housing, a Jeriko House appreciates in value in the same way. Jeriko House is designed with your future in mind. Years from now you'll be as happy with your investment as you were the day you moved in.

getting started

The first step is to learn more. These houses can be created for the needs of virtually anyone and any environment. Starting at \$175 per square foot, the house can grow as your needs and your family grow. To start creating the home of your dreams contact us at (888) 570-5452 .
